

Modbus Router

Quick Start Guide

A-MBR

REQUIRED SOFTWARE

The Modbus Router requires Aparian Slate software to setup and configure. The software installation can be found at www.aparian.com/software/slate.

MODULE INSTALLATION

The Modbus Router requires input power of **10-28Vdc**. The wiring of the power connector can be found in the wiring diagram below. The Modbus Router communicates on both Ethernet and RS232 serial. The wiring of the RS232 connector can be found in the wiring diagram below. The Ethernet connector should be wired according to industry standards which can be found in the additional information section.

NETWORK SETUP

The Modbus Router will have DHCP enabled as factory default. This the user must use a DHCP server to assign an Ethernet network address to the module. Refer to the additional information section for DHCP servers. Once the module has been assigned an Ethernet address the user can configure the module with Aparian Slate.

ADDITIONAL INFORMATION

The following resources contain additional information that can assist the user with the module installation and operation.
